

Health Screening Questionnaire

Children with any of the following symptoms, indicate a possible illness that may decrease the child's ability to learn and potentially spread illness to others. Students must stay home until symptom free for 24 hours without fever/symptom reducing medications.

Please notify us if your child is experiencing any of these symptoms

- Temperature 100 degrees Fahrenheit or higher when taken by mouth in the last 24 hours without use of fever-reducing medication
- Headache
- Fatigue, muscle or body aches
- Chills or sweating
- Sore throat
- Congestion or runny nose
- Cough, difficulty breathing or shortness of breath (for students with chronic allergic/asthmatic cough – a change in their cough baseline)
- Diarrhea, nausea, vomiting, or abdominal pain
- Loss of taste or smell
- Abnormal temperament (“Not acting themselves”)
- Had close contact (within 6 feet for at least 15 min) with a person with confirmed COVID-19 in last 14 days. This will require contacting the County Health Department to determine quarantine protocol.

Quarantine Information (per County Health Department 8-19-21)

- Any student who is deemed a close contact will require a 14 day quarantine.
- A student who is not showing symptoms for 10 days may return at that point, but will remain masked for the duration of said 14 days.
- A student who is not showing symptoms may be tested on or after day 5. If that student has a negative test and remains asymptomatic they may return after day 7, but will remain masked for the duration of said 14 days.
- Any vaccinated person who is deemed a close contact will not be required to quarantine unless they develop symptoms.
- Any class that has a positive case when at school will require a class quarantine.

Guidelines may change based on recommendation by health agencies. Questions regarding return to school should be jointly decided in consultation with parents/caregivers, the Director and the student's health care provider.
